- 125 Employees in Germany, Austria and the United States
- Own In-house Production of Electronics (PCBs) and Mechanical Parts (Chassis etc.)
- Strong Focus on Synchronization:
  - 80% of turnover generated by network clocks (NTP and PTP)
  - Bus level products (PCIe Slot Cards, USB clocks)
  - Accessories
  - Global Technology Leader for NTP and PTP
Unmatched Quality and Performance

- All products go through a full 7 day burn-in test procedure before being shipped to customers
- Integrated and fully automated tests in production plus multi-level functional tests (boards, modules, systems) before shipment
- Best in class performance and interoperability (up to 20,480 unicast slaves at full rate or 2.5 million delay req/s in a 3U chassis)
- Supporting all PTP modes and profiles, never have compatibility problems again! Ethernet/IPv4/IPv6, Multicast/Unicast/Hybrid, E2E/P2P, ...
- Own in-house production facilities allow full control
  - Close cooperation between R&D and Production Dep
  - High flexibility, fast lead times
IMS – Intelligent Modular Synchronization

- Combining a universal Sync Core with application specific input and output interfaces
- Allows in-the-field upgrades and replacements with hot-swapping and hot-plugging support
- Almost no hardware dependencies allow uncounted combinations of interfaces and modules
- Standardized form factors and backplane interfaces allow swapping modules and components between all members of the IMS family
- Very efficient spare part management and unmatched scalability and future-proofness with zero or minimum costs for the end user
microSync Product Family

- Powerful IEEE 1588 PTP Time Servers
  - Inc. IEC/IEEE61850-9-3 & IEEE C.37.238
- High performance (S)NTP Servers
- DIN rail, half rack and full rack solution for a space efficient design
- Various Oscillator options for advanced holdover performance
- Meinberg Device Manager (configuration and status monitoring)
- Lifetime free technical support including firmware updates
